

### Practical Educational Platform

All staff participating in the certification training will complete one of the following education sessions listed below ensuring staff is familiar with the **SensiLase System's technology, disease states and clinical applications respective of their professional capacity.**

The Product Certification Training is administered in two steps:

1. **On-line Education Modules** completed in 5-15 minute segments with written competencies for measuring learning of each module.
2. **Hands-on Site Training** for review of skills:
  - Patient testing for technical staff
  - SPP/PVR interpretation for physicians

Allowing 2-3 weeks for staff to access On-line Education Modules enhances clinic's Hands-on Site Training and overall utilization of the SensiLase System.

#### Clinical Education Session

for **physicians and ordering clinicians** requesting tests, diagnosing patients and interpreting the test results.

#### **SensiLase Primer Competencies** (Part 1 of 2)

- Technology
- System components
- Applications
- Non-invasive technology assessment
- Angiosomes

#### **Clinical Competencies** (Part 2 of 2)

- Introduction
  - Various disease states
  - Ordering of tests
  - Test results interpretation
  - Case study review
- a highly recommended reference tool*

#### Technical Education Session

for **nurses and technicians** administering tests to patients.

#### **SensiLase Primer Competencies** (Part 1 of 2)

- Technology
- System components
- Applications
- Non-invasive technology assessment
- Angiosomes

#### **Technical Competencies** (Part 2 of 2)

- Foundational information
- Skin perfusion pressure
- Pulse volume recordings
- Step-by-step instruction on all system functions
- Understanding test results
- Testing tips & optimization
